

Soggy™ Sick Grip™ now has the world's biggest range of maximum performance Surf Traction Pads (Deckgrips). Sick Grip is formulated from high comfort EVA foam rubber to be flexible, hard wearing and maintain 100% memory shape. **Page 2**

DECK GRIP

Top Lock

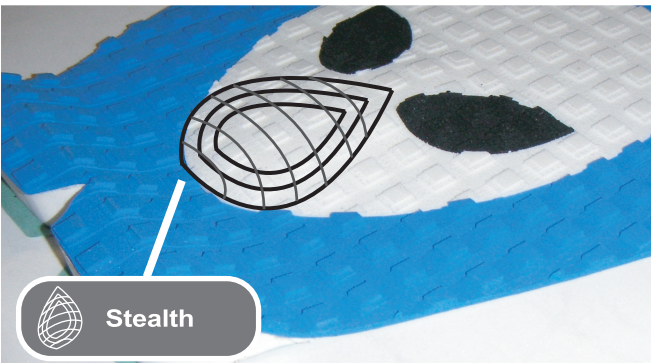

25 mm Kicker

100% Made in Australia

Soggy Sick Grip™ traction pattern ('Top Lock') guarantees maximum consistency in the 'grip zone', with low resistance when laying on the board or moving into position. Absolute style, total performance!

Soggy Sick Grip™ tailpads are fitted with 25mm kickers for maximum leverage, turn and thrust. Soggy's specialised processes ensure your kicker holds its shape for the life of the grip.

Stealth

Shuttle

Soggy Sick Grip™ tail and front pads can be fitted with an optional centre arch for improved foot comfort and board contact. Soggy arches are low profile and flexible, and tailored to the grip design. You can choose your Sick Grip with confidence, knowing that the arch has been manufactured to maximise the performance of your chosen design. All sick grip types and patterns can be supplied without centre arch if desired.

SPIN DEK

Max Control

The Next Generation

New

Spindek™ is a patented, low profile, rotating traction surface for surfboards and other surfing equipment that sticks onto any board in seconds. Spindek™ can rotate up to 360 degrees and has an optional foot strap (Toe Jam). Spindek™ is perfect for regular surfing, tow surfing, kite surfing and wake boarding.
